

## Free Web-Based Training: Age and Ability Friendly Care

Nevada has one of America's most serious shortages of primary care clinicians serving the needs of older adults and family caregivers, according to the U.S. Department of Health and Human Services. Meanwhile, as more seniors move into Nevada, the demand for geriatric health care services is growing dramatically. However, few Nevada clinicians have received training in providing age-friendly services to older Nevadans, leading to a gap in meeting the needs of older patients.

### This three-session series will include:

#### Telehealth and Chronic Disease Management in Seniors

Wednesday, October 2, 2024: 12 – 1 p.m. PT

- Benefits of remote monitoring tools (e.g., blood pressure cuffs, glucose monitors)
- Importance of regular check-ups through telehealth for ongoing management

#### Telehealth in Geriatric Palliative Care: A Patient-Centered Approach to Meeting What Matters and Medications

Wednesday, October 16, 2024: 12 – 1 p.m. PT

- Explore the role of telehealth in expanding access to geriatric palliative care
- Identify best practices for implementing tele-palliative care with a focus on 'What Matters' and medication management
- Utilize telehealth to align care with patients' goals and preferences, fostering a patient-centered approach

#### Using Data to Predict Disability

Wednesday, October 30, 2024: 12 – 1 p.m. PT

- Assemble data from electronic health records and wearable devices to predict development of disability
- Illustrate DeepPlan utilization of implementing advance care planning in a busy primary care environment
